# Function Aw: Power On-Delay With Retrigger / Restart Control

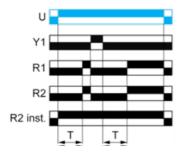

#### **Description**

On energisation of power supply, the timing period T starts.At the end of the timing period T, the output(s) R close(s). Energization of Y1 makes the output(s) R open(s). Deenergization of Y1 restarts timing period T. At the end of timing period T, the output(s) R close(s). The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST")
